

## INFO

### SCIENCE TECHNOLOGY PARK BELGRADE

Science Technology Park Belgrade is supporting entrepreneurs, startups and growing tech companies in innovation development and commercialization of innovative products and services, with the aim of accelerated technological development, export growth, new employment and encouraging young people to start their own businesses.

Since its founding in 2015, **STP Belgrade has supported more than 100 companies** in the development and commercialization of innovative products and services. **7 support programs have been developed** and **more than 500 young potential entrepreneurs were trained**, while **over 3,500 students were introduced to the basics of tech entrepreneurship**.

Today, **STP Belgrade member companies employ more than 850 highly educated people** and **export to over 40 countries in the world** (more than 50% of member companies' revenues come from exports).

These results shows that the development of the right support systems such as science and technology parks can create conditions for young, educated people to develop their ideas and conquer the world from Serbia, and that brain drain from Serbia could be replaced with export of smart products and services.

STP Belgrade member companies operate in the field of information technology, biomedicine, robotics, new materials and nanoscience, energy efficiency and environmental protection, smart cities, as well as innovative agriculture and food production.

STP Belgrade provides innovative companies and teams with a comprehensive set of business services: access to knowledge, mentors, financial funds, certification, promotion and networking, tailored to specific needs and different stages of company development. Beside separate offices, technical and technological infrastructure, all STP Belgrade member companies have at their disposal three innovation laboratories (3D Lab, Laser Lab and CNC Lab) for the accelerated development of hardware solutions.

Science Technology Park Belgrade is the first functional science technology park in Serbia, established in 2015 in the partnership of the Government of the Republic of Serbia (on the behalf of Government: Ministry of Education, Science and Technology Development), City of Belgrade and University of Belgrade, supported by the Swiss Government, with the aim to boost national innovation ecosystem.

In developing innovation supporting and tech-entrepreneurship programs, STP Belgrade collaborates with world-renowned international organization, business associations, public and state institutions, maintains close relations with universities, scientific institutes and research laboratories, other companies in the market and all organizations aimed at developing and strengthening the knowledge-based economy.
